PREFACE

DAF Trucks N.V. attaches great importance to optimal After Sales Support.

In order to maintain and continue to optimise the high standard of the service level, special tools will where necessary be developed by DAF in addition to the standard tools that are commercially available, for the purpose of quality, efficiency, safety, etc.

This manual contains all the special tools released by DAF for vehicle series F45, F55, F65, F75, F85, F95, 65CF, 75CF, 85CF, 95XF, LF45, LF55, CF65, CF75, CF85 and XF95.

All parts contained in this manual can be ordered in the manner as is usual for DAF parts.

If you have any remarks or suggestions concerning the contents, structure or composition of this special tools manual, we will be pleased to hear from you.

DAF TRUCKS
AFTER SALES PUBLICATIONS

Preface

DIRECTIONS FOR USE

The basic arrangement of the special tools manual is virtually the same as the arrangement of the workshop manual.

Groups 1 to 9 contain the special tools for the respective main component.

Group 0 (General) contains universal special tools and special tools used in several groups.

Note:

If a special tool does not occur in the relevant section, look in group 0 (General).

The special tool in question is then one that occurs in several groups.

At the beginning of every group there is a table of contents containing the following columns

- DAF code number
- Relevant vehicle series
- Relevant main components
- Page number

If a tool is used for a main component or vehicle series, this is indicated by a code in the column (1-2-3-R).

This code has the following meaning:

1 - tool for carrying out maintenance work and repair work resulting from it.

2 - tool for frequently recurring work.

3 - tool for less frequently recurring work.

R - replacement part of a tool.

Explanations of the abbreviations used in the tables are:

| | |
|-------------------------------|------------------------------------------------------|
| i.c.w. | in combination with |
| A_1000/2000 | Allison 1000/2000 |
| TS12612 | Twin Splitter 12612 |
| E.PTO | Version with power take-off |
| HGS | Gearbox with Hydraulic Gear Shift |
| Voith-ret. | Version with Voith retarder |
| 150_S/152_S/156_S/182_S/186_S | 150N/152N/156N/182N/186N-shaft in disc brake version |
| 150N/152N/156N/182N/186N | 150N/152N/156N/182N/186N-shaft in drum brake version |
| 09G075 | Co-steering rear axle |
| 09N075/09N220 | Trailing rear axle in drum brake version |
| 09N044 | Leading rear axle (FTP vehicle type) |
| EMAS | Electro-hydraulic multi-axle steering |
| EVS | Electronic vehicle steering |
| RAS-EC | Rear axle steering - electronically controlled |
| ST_TRW | TRW steering boxes |
| ST_ZF | ZF steering boxes |

Directions for use

USE OF TABLE OF CONTENTS

At the beginning of every group there is a table of contents containing the following columns:

- DAF code number of the special tool
- relevant vehicle series
- relevant main components or systems
- page number of the figure

If a tool is used for a main component, system or vehicle series, this is indicated by a code in the column (1-2-3-R).

This code has the following meaning:

- 1 - tool for carrying out maintenance work and repair work resulting from it.
- 2 - tool for frequently recurring work.
- 3 - tool for less frequently recurring work.
- R - replacement part of a tool.

USE OF TABLE OF CONTENTS

At the beginning of every group there is a table of contents containing the following columns:

- DAF code number of the special tool
- relevant vehicle series
- relevant main components or systems
- page number of the figure

If a tool is used for a main component, system or vehicle series, this is indicated by a code in the column (1-2-3-R).

This code has the following meaning:

- 1 - tool for carrying out maintenance work and repair work resulting from it.
- 2 - tool for frequently recurring work.
- 3 - tool for less frequently recurring work.
- R - replacement part of a tool.

Note:

If a special tool does not occur in the relevant section, look in group 0 (General).
The special tool in question is then one that occurs in several groups.

USE OF TABLE OF CONTENTS

At the beginning of every group there is a table of contents containing the following columns:

- DAF code number of the special tool
- relevant vehicle series
- relevant main components or systems
- page number of the figure

If a tool is used for a main component, system or vehicle series, this is indicated by a code in the column (1-2-3-R).

This code has the following meaning:

- 1 - tool for carrying out maintenance work and repair work resulting from it.
- 2 - tool for frequently recurring work.
- 3 - tool for less frequently recurring work.
- R - replacement part of a tool.

Note:

If a special tool does not occur in the relevant section, look in group 0 (General).
The special tool in question is then one that occurs in several groups.

Explanations of the abbreviations used in the tables are:

| | |
|--------------|-----------------------------------|
| A_1000/ 2000 | Allison 1000/2000 |
| TS12612 | Twin Splitter 12612 |
| E.PTO | Version with power take-off |
| HGS | Gearbox with Hydraulic Gear Shift |
| Voith-ret. | Version with Voith retarder |

GEARBOX

3

0192536

Octagonal socket for reversing light switch

0192536

3

0192537

Gripper for input and output shaft bearings (i.c.w. 0535662)

0192537

0192538

Gripping piece for auxiliary shaft bearings (i.c.w. 0535662)

0192538

0192539

Demounting/mounting jig for main shaft/secondary shaft

0192539

0192540

Demounting/mounting jig for main shaft/secondary shaft

0192540

3

0192541

Synchronisation body puller for demounting main shaft

0192541

0192542

Puller for main shaft tapered roller bearing

0192542

0192544

Driving tool for mounting ball joint cover in gearbox housing

0192544

GEARBOX

3

0192545

Driving tool for fitting bearing bush in selector housing

0192545

3

0192546

Selector shaft guide sleeve

0192546

0192547

Secondary shaft guide sleeve, 3rd/4th gear

0192547

0192548

Adapter for M65x2 (i.c.w. 0535662)

0192548

0484966

Centring pin for clutch plate/clutch release assembly

0484966

3

0484978

Puller, output shaft flange

0484978

0485063

Oil seal punch, gearbox output shaft

V300890

0485099

Puller, output shaft forked coupling

0485099

GEARBOX

3

0535409

Input shaft seal driving tool

0535409

3

0535410

Odometer connecting piece seal driving tool

0535410

0535423

Gearbox front cover seal driving tool

0535423

0535659

Selector shaft seal and dust seal driving tool

0535659

0535662

Puller, basic tool (i.c.w. various extensions/adapters/
bearing grippers)

0535662

3

0535703

Gearbox front cover oil seal installer

0535703

0535788

Puller for removing bearing bush

0535788

0535790

Counter-puller (i.c.w. 0535817)

0535790

GEARBOX

3

0535793

Extension for M65x2 (i.c.w. 0535662)

0535793

3

0535817

Puller for removing gearbox housing ball joint cover
(i.c.w. 0535790)

0535817

0535898

Output shaft seal driving tool

0535898

0535928

Driving tool for fitting lock plate on output shaft flange
bolts

0535928

0535932

Ring holder for mounting input shaft axial ring

0535932

0694720

Gripper for demounting auxiliary shaft tapered roller bearing on output side (i.c.w. 0535662)

0694720

0694770

M12 lifting eye for demounting/mounting intermediate shaft/auxiliary gearbox housing

0694770

0694771

Gripper for demounting auxiliary shaft bearing (i.c.w. 0535662)

0694771

GEARBOX

3

0694779

Hoisting tool for mounting/demounting selector shaft and auxiliary shaft (i.c.w. 12400410/1240414/1240413)

0694779

3

0694780

Output shaft oil seal installer (i.c.w. 1310466)

0694780

0694793

Gripper for demounting secondary shaft bearing (i.c.w. 0535662)

0694793

0694796

Gripper for demounting auxiliary shaft tapered roller bearing (i.c.w. 0192548/0535793/0535662)

0694796

0694798

Lifting eye for demounting/mounting main shaft

0694798

3

0694814

Gripper for demounting intermediate shaft tapered roller bearing (i.c.w. 0535662)

0694814

0694815

Gripper for demounting intermediate shaft tapered roller bearing

0694815

0694816

Installer for oil seal (60 x 74), output shaft

0694816

GEARBOX

3

0694817

Protective sleeve for mounting oil seal and selector shaft scraper ring

0694817

3

0694818

Driving tool for removing and fitting selector housing bearing

0694818

0694819

Lifting plate, auxiliary and main shafts

0694819

0694858

Adapter, oil pump drive cam puller (i.c.w. 0535662)

0694858

0694903

Output shaft lock plate driving tool

0694903

0694990

Threaded spindle for fitting Voith retarder on gearbox
output shaft (i.c.w. 0694992)

0694990

0694991

Voith retarder valve threaded spindle nut

0694991

0694992

Thrust bearing for fitting Voith retarder to gearbox (i.c.w.
0694990)

0694992

GEARBOX

3

0694993

Voith retarder demounting/mounting plate

0694993

1451988

Driving tool

1451988

1451989

Driving tool (i.c.w. 1451988)

1451989

1451990

Adapter plate for flange counter-wrench

1451990

3

1451991

Puller set for bearings and bushes

T1451991

1451992

Selector switch adjusting tool

1451992

1453124

Disassembly tool for selector shaft seal

1453124

GEARBOX

3

1453125

Assembly tool for selector shaft seal

V300893

3

1453138

Tool for fitting gearbox modulator

V300894

1453143

Gearbox control adjustment jig

V300900

1453145

Seal driving tool

V300896

1453148

Installing output shaft seal

V300897

3

1453154

Spacer ring for fitting output shaft seal

V300898

USE OF TABLE OF CONTENTS

At the beginning of every group there is a table of contents containing the following columns:

- DAF code number of the special tool
- relevant vehicle series
- relevant main components or systems
- page number of the figure

If a tool is used for a main component, system or vehicle series, this is indicated by a code in the column (1-2-3-R).

This code has the following meaning:

- 1 - tool for carrying out maintenance work and repair work resulting from it.
- 2 - tool for frequently recurring work.
- 3 - tool for less frequently recurring work.
- R - replacement part of a tool.

Note:

If a special tool does not occur in the relevant section, look in group 0 (General).
The special tool in question is then one that occurs in several groups.

USE OF TABLE OF CONTENTS

At the beginning of every group there is a table of contents containing the following columns:

- DAF code number of the special tool
- relevant vehicle series
- relevant main components or systems
- page number of the figure

If a tool is used for a main component, system or vehicle series, this is indicated by a code in the column (1-2-3-R).

This code has the following meaning:

- 1 - tool for carrying out maintenance work and repair work resulting from it.
- 2 - tool for frequently recurring work.
- 3 - tool for less frequently recurring work.
- R - replacement part of a tool.

Note:

If a special tool does not occur in the relevant section, look in group 0 (General).
The special tool in question is then one that occurs in several groups.

USE OF TABLE OF CONTENTS

At the beginning of every group there is a table of contents containing the following columns:

- DAF code number of the special tool
- relevant vehicle series
- relevant main components or systems
- page number of the figure

If a tool is used for a main component, system or vehicle series, this is indicated by a code in the column (1-2-3-R).

This code has the following meaning:

- 1 - tool for carrying out maintenance work and repair work resulting from it.
- 2 - tool for frequently recurring work.
- 3 - tool for less frequently recurring work.
- R - replacement part of a tool.

Note:

If a special tool does not occur in the relevant section, look in group 0 (General).
The special tool in question is then one that occurs in several groups.

USE OF TABLE OF CONTENTS

At the beginning of every group there is a table of contents containing the following columns:

- DAF code number of the special tool
- relevant vehicle series
- relevant main components or systems
- page number of the figure

If a tool is used for a main component, system or vehicle series, this is indicated by a code in the column (1-2-3-R).

This code has the following meaning:

- 1 - tool for carrying out maintenance work and repair work resulting from it.
- 2 - tool for frequently recurring work.
- 3 - tool for less frequently recurring work.
- R - replacement part of a tool.

Note:

If a special tool does not occur in the relevant section, look in group 0 (General).
The special tool in question is then one that occurs in several groups.

Explanations of the abbreviations used in the tables are:

| | |
|-------------------------------|------------------------------------------------------|
| 150_S/152_S/156_S/182_S/186_S | 150N/152N/156N/182N/186N-shaft in disc brake version |
| 150N/152N/156N/182N/186N | 150N/152N/156N/182N/186N-shaft in drum brake version |
| 09G075 | Co-steering rear axle |
| EMAS | Electro-hydraulic multi-axle steering |
| EVS | Electronic vehicle steering |
| RAS-EC | Rear axle steering - electronically controlled |
| ST_TRW | TRW steering boxes |
| ST_ZF | ZF steering boxes |

USE OF TABLE OF CONTENTS

At the beginning of every group there is a table of contents containing the following columns:

- DAF code number of the special tool
- relevant vehicle series
- relevant main components or systems
- page number of the figure

If a tool is used for a main component, system or vehicle series, this is indicated by a code in the column (1-2-3-R).

This code has the following meaning:

- 1 - tool for carrying out maintenance work and repair work resulting from it.
- 2 - tool for frequently recurring work.
- 3 - tool for less frequently recurring work.
- R - replacement part of a tool.

Note:

If a special tool does not occur in the relevant section, look in group 0 (General).
The special tool in question is then one that occurs in several groups.

Explanations of the abbreviations used in the tables are:

| | |
|---------------|------------------------------------------|
| 09N075/09N220 | Trailing rear axle in drum brake version |
| 09N044 | Leading rear axle (FTP vehicle type) |

USE OF TABLE OF CONTENTS

At the beginning of every group there is a table of contents containing the following columns:

- DAF code number of the special tool
- relevant vehicle series
- relevant main components or systems
- page number of the figure

If a tool is used for a main component, system or vehicle series, this is indicated by a code in the column (1-2-3-R).

This code has the following meaning:

- 1 - tool for carrying out maintenance work and repair work resulting from it.
- 2 - tool for frequently recurring work.
- 3 - tool for less frequently recurring work.
- R - replacement part of a tool.

Note:

If a special tool does not occur in the relevant section, look in group 0 (General).
The special tool in question is then one that occurs in several groups.

CHASSIS
